EDUCATION

GLA UNIVERSITY

Bachelor of Technology - Computer Science: CGPA: 7.40

Mathura, India

2023-2027

TECHNICAL SKILLS

- **Languages:** Java, Python, SQL, JavaScript, HTML/CSS, TypeScript .
- **Frameworks/Libraries:** Node.js, Express.js, React.js, Tailwind CSS, Pandas, Matplotlib .
- **Databases/Cloud:** MongoDB, MySQL, AWS, Docker, Kubernetes .
- **Core Concepts :** Data Structures and Algorithms, Low-Level System Design, Operating Systems, Object-Oriented Design & Programming, Computer Networks, Database Management Systems.

Experience

AICTE Virtual Internship – AI/ML Intern (June 2025 – July 2025)

[Link](#)

- Developed an end-to-end Garbage Classification system in Python using image datasets with multiple waste categories.
- Implemented data preprocessing, image augmentation, feature extraction, model training, evaluation, and optimization to improve classification accuracy.

PROJECTS

GDVerse | Nodejs, Express.js, MongoDB, React.js, Tailwind , Socket.io, WebRTC

[Live](#) / [GitHub](#)

- An AI-powered group discussion platform for placement preparation, enabling students to create secure discussion rooms via unique keys with live participant management, camera, and microphone controls.
- Integrated AssemblyAI for real-time speech analysis to assess clarity, tone, and vocabulary, generating automated performance reports and personalized feedback.

Quick-Chat App | Nodejs , Express.js, MongoDB, React.js, Socket.io, Cloudinary, Tailwind [Live](#) / [GitHub](#)

- Built a real-time chat platform supporting instant messaging, live online/offline status tracking, and secure user authentication using JWT-based authorization.
- Implemented image sharing with cloud-based media storage, profile management, and a chat-specific media gallery enabling users to view all images shared with a particular contact

Medicos - Hospital Administration | Nodejs, Express.js, MongoDb, React.js.,Tailwind [Live](#) / [GitHub](#)

- Developed a hospital management system with role-based authentication using JWT, supporting doctor profile management and real-time appointment scheduling, updates, and cancellations.
- Integrated payment processing, profile management, and real-time notifications to streamline operations and improve coordination between doctors, patients, and admins.

CERTIFICATIONS & ACHIEVEMENTS

- Achieved **Knight level** on LeetCode , contest rating of 1854* demonstrating strong problem solving.
- Secured **AIR 615** and **AIR 1041** in Meta Hacker Cup Round 1 & 2 (2025) . [Link](#)
- Achieved **AIR 115 in Amazon ML Challenge 2025** with a score of 46.761 among 6,000+ teams. [Link](#)
- **Solved 1300+** DSA problems across LeetCode, Codeforces, CodeChef and other. [Coding Profile](#)
- **2 x Global Rank under 250** in **CodeChef** Starter Div . [Link](#)
- **2 x Global Rank under 1200** in **LeetCode** Biweekly & Weekly Contest. [Link](#)
- Achieved 3 star Coder rating on CodeChef and Pupil rank on Codeforces.
- Completed 1-month **industrial training** in **DevOps** and Cloud Computing by Coding Blocks. [Link](#)
